

Homework for January 13, 2020

1. Visit RAZ-Kids and Zorbits
2. Read each night.
3. Complete the questions below.

Visit iXL Math

- Time
- Temperature

In Literacy, we have been answering questions about texts. Students are working on using complete sentences and adding direct proof when responding to questions. Students are to read the paragraph below and then answer the questions.

My day started with the sound of my alarm clock! As I glanced at the clock I couldn't believe my eyes! I had slept in and now my heart was racing. Was I going to get to my friend's special surprise birthday party on time? I rushed into my parents' room but couldn't find them. Where were they? I sprinted downstairs and there they were still in their pajamas. I was frantic. "Mom, dad, I'm late for Tamara's party!" Neither responded! I shouted once more, "Mom, dad, did you hear me?". All of a sudden my brother entered the room laughing! Then he whispered - "It's January 13th and Tamara's party is on the 20th. You're a week early". Man was I relieved!

Where does this text take place?

How was the main character feeling? Prove your thinking with proof from the text.

2. Complete the question below. Remember the feedback you have been given to bump-up your work.

Mr. Joe went outside to take the temperature. It was 20°C . Each hour he went outside the temperature decreased by 3°C . What was the temperature after the 6th time he went back outside? What type of temperature is this and how do you know?
