

K-3 Math Learning Beyond the Classroom

Zorbit's Math Adventure has Landed in OCSB

This year, our school is teaming up with Zorbit's Math Adventure to elevate math learning in our K-3 classrooms. Zorbit's is a math resource that builds skills and confidence in learners who struggle and provides extra inspiration for those who excel.

Zorbit's is a whole suite of tools for the classroom, but the foundation is the Zorbit's Math Adventure game that makes math playful. Students will play in class and we are encouraging families to play at home as well. Here are a few reasons why...

- Gameplay develops and strengthens math skills outside of class time
- Performance data from the game gives teachers insights on needs and achievements
- Confidently say "Yes" to at-home screentime knowing it is *productive* screentime.

Accessing Zorbit's Math Adventure at Home

Students can play Zorbit's by logging into their Student Portal and clicking on the Zorbit's app icon.

Alternatively, students can use the login information on their Zorbit's Parent Letter to play in a web browser at play.zorbitmath.com (64-bit Chrome recommended) or by [downloading the iOS app for iPad](#). If using iPad, it's important to keep your app up to date with the latest releases so all the newest features and games are accessible.
